

1. Make sure to dispose of combustible garbage in the designated garbage collection bags

Aside from being able to dispose combustible garbage as per normal in the garbage bags designated by the town and put it out at the garbage collection points, you can also take garbage directly to the Tatebayashi Clean Center. In this case, you don't need the garbage bags designated by the town, however, a fee is charged according to the weight of the garbage being disposed. ※ Please refer to the Tatebayashi Hygiene Facilities Union regional garbage processing facilities section for more details.

Collection day

Every **Monday, Wednesday, and Friday**

During the consecutive holidays in May and September, as well as the year-end/New Year period, please note that the schedule follows "2. Combustible Garbage Collection Calendar"

Collection will also continue during public holidays without change. We will notify you through an announcement in the local newsletter if there are any changes.

Time 8:30 a.m.

Put the garbage out at the garbage collection points by this time. Please make sure to put your garbage out on the day it is collected, otherwise it will cause problems for others.

The Environmental Common Bag shown in the photo can also be put out for collection at garbage collection points.

For example, if you forget your reusable bag and purchase an Environmental Common Bag as a checkout bag, you can use it as a waste bag and put it out for collection.

As the Environmental Common Bags are checkout bags, they cannot be exchanged with the vouchers for designated waste collection bags.

What you can dispose at the garbage collection points

Notes

Tie the garbage bags tightly before taking them out.

Food waste

Remove all moisture

Paper diapers

Dispose of the contents in the toilet

Rubber Leather products

Remove the metal parts

Scrap pieces of paper

Pruned branches

Turned into chips using a grinder

※ Loan of the grinder requires submission of an application form

Application reception desk

Contact a specialist to perform a maintenance checkup and cleaning of septic tanks

If a septic tank is not properly maintained, the waste will flow out from the discharge area and have a negative impact on the surrounding living environment. Because of this, a specialist needs to be requested to perform proper maintenance checks and cleaning.

Households with a septic tank that do not yet have a contract for these services are advised to start a contract with a registered septic tank maintenance inspector and a cleaning professional designated by Meiwa Town.

Contact the Tatebayashi Branch of the Septic Tank Association for inquiries regarding requesting a registered inspector to perform a septic tank maintenance check. ☎ 0276-74-5500
